**Business Summary and Development**

**1. COVID-19 Pandemic Impacts**

During the reporting period under review, the ongoing COVID-19 pandemic has caused intense disruptions for the global supply chains and regular business operations. In consideration of the long term effect of the pandemic, public have become less optimistic about the global economy and more

cautious in their views on potential scenarios for COVID-19 recovery. To date there have been significant wide-spread stock market declines.

The Company has been monitoring the potential impact of COVID-19 pandemic on our operations since mid-February 2020. At this time, it is unknown the duration and extent of the impact of the coronavirus pandemic may have on the Company as this will depend on future developments that are highly uncertain and cannot be predicted with confidence. The Group's operations may be adversely affected if significant portions of its workforce are unable to work effectively due to illness, quarantines, government-mandated closures of specific activities or other restrictions in connection with future waves of COVID-19 pandemic. As at June 30, 2020, the management determined that its general operation of business, working capital and the value of the Company's assets were not materially impacted. Given the importance of cash flow in times like this, we have developed treasury strategies for cash management as part of our overall business risk plans, including but not limited to suspension of dividend distribution, strengthening cost control measures and salary reduction programme. Meanwhile, the Company continues to work on timely adjustment on investment plans in light of the current conditions and will explore opportunities in a proactive manner.

As uncertainties from the outbreak are likely to persist, the management will monitor closely the rapidly evolving situation and compile an assessment of the longer-term structural changes that may come out of the pandemic.

## **2. Gold Project in Xinjiang**

The Company owns a 70% equity interest in Xinjiang Tongyuan Minerals Limited which holds the Sawayaerdun Gold Project ("Gold Project") in Xinjiang. The exploration licence has an expiry date on August 22, 2021. The mining licence was expired on December 23, 2019 and renewal application had been accepted by both the Department of Land and Resources of Wuqia County and the Department of Land and Resources of Kezilesu Prefecture. In this quarter, we were requested to submit the land rehabilitation report which was submitted to Department of Land and Resources of Xinjiang in July 2020. As at the reporting date, public services of the Department of Land and Resources was further impacted by the local resurgence of COVID-19 in Xinjiang. It is expected that the renewal application of the mining licence will be processed after determination of reserve by the Department of Land and Resources as well as payment for the related fee based on the assessed reserve. However, due to work piled up during the pandemic, it may take longer time to proceed our renewal of the mining licence.

The on-site industrial test on applying bio-tech methodology on extraction of metals from large-scale samples of gold ores was in pre-oxidation stage. The cultured bacteria reached its target volume with warmer weather in Xinjiang, and large-scale sample has been taken and delivered for further testing in May and June 2020. Based on the analysis of the samples collected, the cultured bacteria were found active in the ore heap which indicated the pre-oxidation of ores has gone well. Impacted by the local resurgence of COVID-19, the remaining monthly samples will take longer time to deliver for analysis results. Due to the more strengthened control implemented on procurement of sulphuric acid, the testing suffered from short of sulphuric acid for about 8 weeks until the end of this quarter. After the pre-oxidation stage and subject to the analysis result of the samples, the industrial test would enter the final stage of immersion gold process probably in year 2021.

Considering the upward trend of gold price and positive progress with respect to the on-site industrial test of the Gold Project, there was no impairment indication related to the assets of the Gold Project.

For the period ended June 30, 2020, there was addition of \$0.1 million in the exploration and evaluation assets and the Group had a contractual commitment of \$1.5 million for the future development of the Gold Project.
